

Evidence 1 – NxtAbroad AI

Applicant: Ibrahim Akintunde Akinyera

UK Global Talent Visa – Mandatory Criterion (Innovation)

Executive Summary

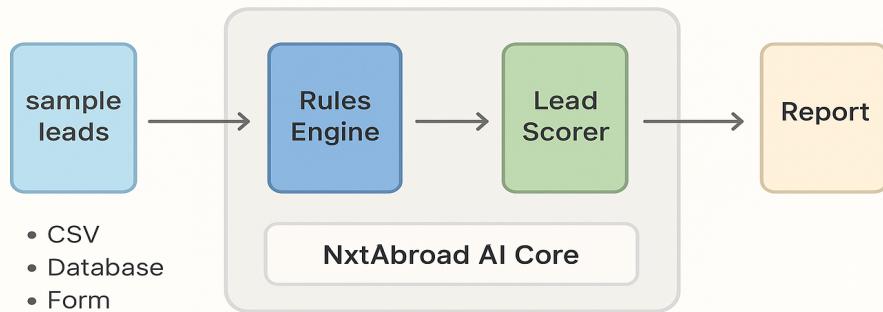

NxtAbroad AI is a rules■driven visa readiness and eligibility engine created and engineered by Ibrahim Akintunde Akinyera. The system evaluates academic, financial, documentation, and risk criteria for applicants across the UK, Canada, Europe, and the UAE. It is actively used inside NxtAbroad Limited to standardise and accelerate student profile assessments.

Founder Declaration

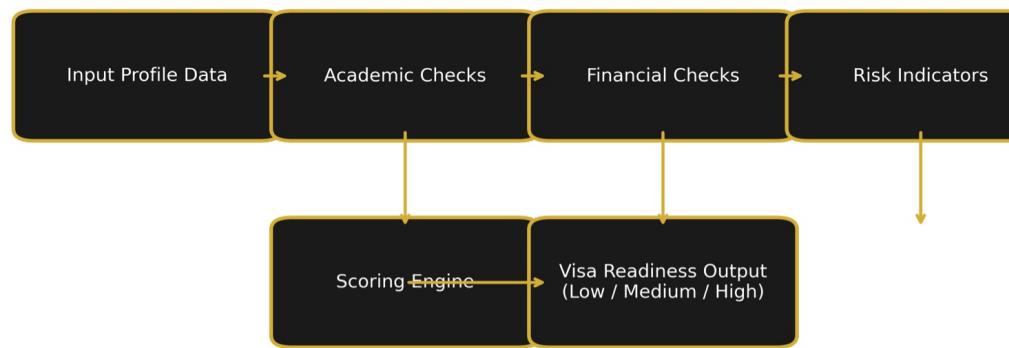

I, Ibrahim Akintunde Akinyera, confirm that I personally designed, architected, and built the complete NxtAbroad AI system, including all Python modules, rules engine logic, scoring model, workflow diagrams, and deployment inside NxtAbroad Limited. No external developers contributed to the core engineering work represented in this evidence.
